cordially invite you to a WHA72 side event

HEALTH PROMOTION THROUGH THE LIFE-COURSE

A call to action to leave no one behind

May 22, 2019, 07.00 - 07.50 PM
Room IX, Palais des Nations, Geneva

Healthy snacks as well as coffee, tea and water will be served

RSVP

Promoting health through the life course means to invest in prevention and to provide treatment and care services whenever and for whoever necessary. This side event explores the realities of adolescence and youth as well as older age in relation to NCDs risk factors. We will as well explore commonalities to foster synergies in a life course approach to health promotion. Finally, this side event will discuss solutions and their evidence-base that help promote health and quality of life among adolescents and older people.

The objective of this side event is to inform decision-makers about cost-effective, high-impact, evidence-based solutions that are available to protect and promote the health of youth and older people.
